SUMMARY

Full stack engineer with 3+ years of experience building e-commerce platforms, Shopify apps and SaaS products, from Next.js/React frontends and Node.js/NestJS APIs to serverless AWS backends, plus agentic AI development with Claude Code and multi-agent workflows.

EXPERIENCE

Codeking Technologies Pvt. Ltd. — *Junior Software Engineer* Dec 2024 – Present · Jaipur

- Build public and private **Shopify apps** with Node.js, Remix, GraphQL Admin API and order/checkout webhooks.
- Develop custom **Shopify storefronts and Liquid themes** with account features, checkout flows and order management.
- Design **serverless AWS backends** (Lambda, SQS, RDS, S3, EC2) with the Serverless Framework, CloudWatch and CI/CD.
- Integrate Klaviyo, Google Analytics, Tag Manager and Google Ads into client stores; interview candidates for Node.js roles.
- Build apps with a **doc-first, agentic approach** in **Claude Code**: specs first, then **multi-agent workflows** to build and review.

Apna School App — *Full Stack Developer* Oct 2024 – Dec 2024 · Jaipur

- Built a cloud-based **school ERP** (web and Android) **adopted by about 15 schools** in the Delhi and Jaipur region.
- Developed REST APIs in **NestJS** with MongoDB, and frontends in Next.js, React, Zustand and Tailwind CSS.
- Shipped attendance, staff–student–parent communication and resource management modules.

Ubuy India — *Software Engineer (Full Stack)* Sep 2023 – Oct 2024 · Jaipur

- Built a **monorepo architecture** for Ubuy's cross-border e-commerce web app with Next.js, Redux and Express.js.
- Combined client-side routing with **server-side rendering** for fast navigation across SSR product pages.
- Restructured Redux state flow, **cutting page re-renders by 2x**; built REST APIs on MySQL with **Redis caching**.

Ventureheap Pvt. Ltd. — *Full Stack Intern* Feb 2023 – Jul 2023 · Jaipur

- Delivered React frontends, Express.js/MongoDB APIs with JWT auth, and custom WordPress themes and plugins for clients.

PROJECTS

PSD-to-3D Product Mockup Engine *Python, OpenCV, NumPy, SciPy, psd-tools, WebGL*

- Extracts Photoshop smart-object **grid-warp data** from PSDs into **exact UV/vertex meshes**, no image registration.
- Browser editor with a **two-pass WebGL renderer** that warps artwork onto product meshes for live previews.
- Automated print files by slicing per-size pattern PDFs into 300 DPI cut pieces with OpenCV; powers 6+ apparel products.

DNS Resolver *JavaScript, Node.js, UDP*

- Built a DNS resolver from scratch that encodes and parses DNS packets over UDP, with support for multiple record types.
